KSC, Shuttle fleet survive Hurricane Floyd threat

Kennedy Space Center, Fla., was spared heavy winds expected from Hurricane Floyd. Sustained winds were reported at 63 mph. Four Space Shuttles housed in the Vehicle Assembly Building and Orbiter Processing Facility were not damaged. No structural damage is reported at any major buildings. Some power losses were reported, and chillers cooling some payload equipment went down, but were restored within 10 minutes. Inspections of the launch pad areas and smaller buildings are continuing.

**Center blood drive
Friday, 8 a.m.- 1:30
p.m., North loop,
Bldg. 4203**

**LAN outage set
Saturday, noon-
4 p.m., Bldg. 4705**

Black History Month volunteers needed

Volunteers are being accepted to chair or serve on various committees for the Year 2000 Black History Month activities in February. For more information, call Dawn Cross at 544-1835 or James Bailey at 544-2523 by Sept. 30.

In this week's Marshall Star:

- Chandra's high-resolution camera sends back images of supernova remnants
- Space Transportation Day set Oct. 27 at Marshall
- Retirees, contractors can contribute to Combined Federal Campaign

**Volunteers needed
for Big Spring Jam.
